

The MDS (Just MDS)

Yuhan Tang (z5531575), Akane Opek (z5451214)

What Problems do Patients face?

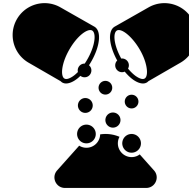

Forgetting to pack/bring medication

Not hearing alarms

Limited usability in various environments

Spilling medication

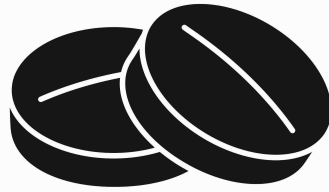

Pricy Medication cases

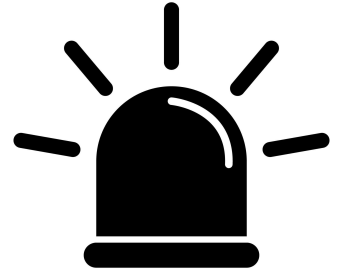

What does the MDS do?

Portable and
Lightweight

Keep your
medication's
integrity

Automatic Alerts
- free up your
mind

Key Features

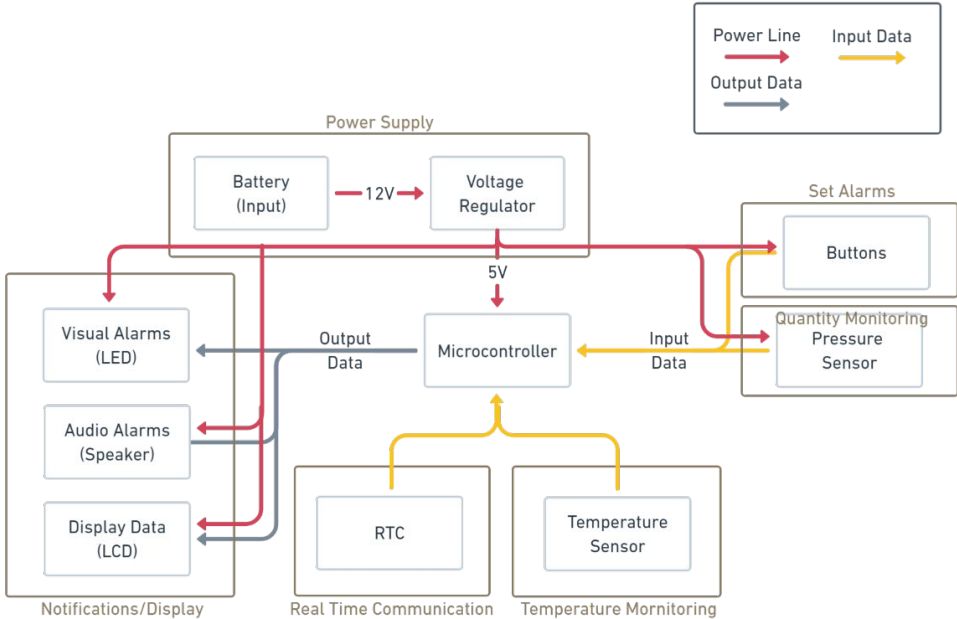

- Visual and audio alarms
- Notify user to refill medication
- Real time communication

Components

Microcontroller	ESP-WROOM-32
LCD	LCD1602
Speaker	CVS-1508
LED	BL-BUBGE271G
Temperature Sensor	BMP180
Pressure Sensor	HX711

High-level Block Diagram

Demonstration

Go/**No-Go**

Material Cost

\$48.61, which **exceeds** what patients may be willing to pay but **cheaper** than competitors.

Technical Feasibility

Yes, it is **feasible** as it only involves basic subsystems. The product will be **easy to mass-produce and market**.

USIs

Only provides the most basic functionalities, the present MDS is **not unique** in the market.

Damage Resistance

Cannot guarantee product's robustness as it incorporates many small components.

Shelf Life

The product will have a **long shelf life** as it has easily replaceable batteries and no moving parts.

Size

Due to the 12V requirement necessitating 8 batteries, the product's size has **exceeded** what we have previously outlined.
